

Big Box Eave

This unit is our top-of-the-line model with the more attractive, even larger boxing than the Eve unit. This unit is available in both wood-stud and steel-stud frames with our aluminum framed door standard with your option of choosing the mobile home type door or the roll up door.

Greenhouse

For the gardener in the family, our Green Houses are available in mist green fiberglass or clear poly-carbonate panel made specifically for green house use. The framing is constructed of strong 18 or 20 gauge steel galvanized studs. All units are standard without a floor that enables you to use bark, gravel, or whatever you think best absorbs the water that is used when you water your plants. We also offer two or three different flooring systems upon your request. All units are standard with wiring in 1/2" EMT conduit with lights and receptacles, wire mesh shelving on three walls and a 32" mobile home-type door with window for extra ventilation. Options include thermostat controlled exhaust fans and sprinkler systems. This unit is the perfect gift for you or a friend with a "Green Thumb".
