

Eave

The Eave has the same type gable as the New-Type-eve, however a few upgrades are added. Rather than the basic trim as the New-Type-Eve, this unit has a boxed trim which gives it a little more decorative look. This unit is standard with a 42" mobile home type door, however, as with all of our buildings, you can specify any type of door you desire. In the state of Florida, all buildings are standard with a 4' aluminum door and various sizes of mobile home type doors available upon request.

T-1-11 Storage Building

This is our most economical wood-sided building, 5/8" T-1-11 siding that covers this frame makes this building as structurally sound as any shed on the market. The siding is natural with a sprayed on clear protective coating. However, if you plan on painting the shed in the near future, we can leave the sealer off. This unit is standard with a wood door, windows, and electrical outlets depending on the size unit ordered. This unit is also available with a mobile home type door as a standard feature and a shingle roof is available upon request. We also offer pressure T-1-11 siding as an option.
